Final 2-2

⇒ **important**

Course	Syllabus	Mark Distribution
CSE 209	• Logic Gates with IC ○ Truth Table, Equation, Diagram • Boolean Algebra ○ Simplification ○ K-Map ○ Universality of NAND and NOR gates • Adders ○ Half, Full, BCD Adder • Flip Flop ○ SR Latch + FF ○ JK FF ○ D FF • Counter ○ Async, Sync + Up, Down, Up/Down + MOD x (x stands for any integer) ○ Random/any sequence counter ○ Ring, Johnson • MUX, Demux • Decoder (n - 2^n line internal circuit)	Design a synchronous counter for any sequence (10 marks).[Circuit excitation table - 4 marks, simplification - 4 marks, circuit - 2 marks]
CSE 211	• Chapter 2 (Relational Algebra) • Chapter 3 (SQL) • ER Diagram i) ER to Schema ii) Description to ER • Normalization • Transaction	

CSE 207	• Dynamic Programming • Greedy Algorithm (Fractional Knapsack, Coin Change, Job Sequence) • Graph (Krushkal, Prim, DFS, BFS, Dljkstra, Bellman ford) • Backtracking (Nqueens, Color Matching of Graph) • String Matching • Approximate Algorithm	
MTH 203	• Mean, mode, median, Mean Deviation, Standard Deviation • Skewness, Correlation • Probability (Lec 1-7) • Hypothesis Testing	Question 1-2 - from Mid part Question 3-4 - Probability Question 5 (will have OR) - Standard Normal Distribution, Hypothesis
ECN 201	• Price Elasticity • Circular flow of GDP and PPF (**MID TOPIC**) • GNP vs GDP • CPI and Maths • GDP deflator, calculation, methods, components • Inflation rate • Unemployment rate + calculation
