Course	Syllabus	Mark Distribution
CSE 209	• Logic Gates with IC ○ Truth Table, Equation, Diagram • Boolean Algebra ○ Simplification ○ K-Map ○ Universality of NAND and NOR gates • Adders ○ Half, Full, BCD Adder • Flip Flop ○ SR Latch + FF ○ JK FF ○ D FF • Counter ○ Up Counter ○ Down Counter ○ MOD Maths ○ Timing+State Diagram	Question 1 - 7 Question 2 - 7 Question 3 - 6
CSE 211	• Chapter 1 • Chapter 2 (Relational Model) • Chapter 3 (SQL Basics)	Question 1 - Theory + Relational Algebra Question (10 marks) Question 2 - DDL + DML (10 marks)
CSE 207	• Time Complexity • Master Method • Search and Sort ○ Binary & Ternary Search ○ Merge & Quick Sort • Dynamic Programming ○ LCS ○ 0/1 Knapsack	

MTH 203	● Frequency Distribution ● Central Tendency ○ Mean (AM, GM, HM) ○ Median, Mode ○ Quartile, Decile, Percentile ● Dispersion ○ Standard Deviation ○ Quartile Deviation ○ Mean Deviation ○ Variance & Covariance Probability: 1) Addition Law 2) Not Mutual Exclusivity 3) Multiplication Law 4) Conditional Probability 5) Bayes Theorem ***Note**: Also try to have an idea of Permutation and Combination which are already taught in Discrete Mathematics.*	
ECN 201	● Economics ● Demand & Supply ● Market Equilibrium
